* = Contain short steep sections

** = Whole trail is very steep, use caution

*** = Steep Trail & Cliff Drop offs (STAY ON TRAIL!)

Safety on the Trails

1. Stay on Marked Trails

A. Trout Brook water levels constantly change resulting in thin ice with deep water underneath. **NEVER** venture onto the ice over the river.

B. There are **multiple steep vertical ledges** on this property. **NEVER** venture next to a ledge to “just see what is down there”!

C. Be careful where you step. Do not step onto rocks or stumps that stick up and could damage the snowshoe.

D. The Green Hill Expert Trails: Don't start trail after 2pm, bring a headlamp as you are FAR from the Lodge!

2. Return to Lodge by 4pm

A. Depending on the date, it gets dark early in the winter. It is always a good idea to bring a **headlamp** with you (just in case).

B. Sign into the Log Book upon Departure & Return.

3. Monitoring the Trails

A. Two -way Radios. We monitor channel 7, sub channel 7. Bring one if you have one.

B. Most of the trails get a cell phone signal (best is Verizon). Our office phone # is 518-494-2283.

C. If you do not **return by 4pm**, we will look for you on our snowmobiles or Polaris Ranger.
